

What are your highest priority issues that CERF could support (check up to three)?

Are there any other high priority issues that you would like to see CERF support?

Beautification of infrastructure/public art

Technical training

development of a racial equity frame work that could be used across the region

Active transportation, more money invested in transit and walkable / rideable transportation

Apprenticeship and pre apprenticeship workforce training programs

Forestry and Watershed Management and Wildfire Mitigation

Safe bicycle acces

More efficient transit operations.

replace diesel trucks with electric/fuel cell
replace buses with electric/fuel cell

Are there any other high priority issues that you would like to see CERF support?

Provide funding to community organizations to do education and outreach in the community to connect diverse community members to real job opportunities.

We need a statewide equitable energy strategy that doesn't leave behind underserved communities as we transition to a carbon free economy.

Forest management pilot projects to address wildfire risk

Economic and workforce development

SVS station improvements

Make workforce education a standard throughout K-12: awareness, exploration, preparation.

Provide training, access and awareness of clean energy jobs to our underserved communities.

Support for small business development and growth among minority/LEP businesses

ZEV infrastructure

Are there any other high priority issues that you would like to see CERF support?

low-carbon solutions that work for our communities.

Support for homeless population

Identity what are considered clean energy jobs and how to get them.

Financing programs for small biz and solar/credit enhancement measures

Technical Support for small businesses

Getting employers engaged in this process and committed to hiring.

Train to hire projects for targeted populations or communities, especially Black and Brown, and public housing.

Infill housing near transit

training and education regarding transit/transportation career opportunities specific to clean mobility

Are there any other high priority issues that you would like to see CERF support?

create space for combining underrepresented communities with access to agricultural opportunities

Train to hire programs for transitional aged youth, beyond entry level and construction.

capacity building for community based organizations so they can engage in policy decisions

Looking for opportunities to layer clean mobility with other clean energy equity programs

Biomass conversion of forestry fuels to hydrogen and biochar including utilizing green energy or AFV Trucks to transport to and from the facility

Funding for businesses and entrepreneurs focused on the clean economy sector in undeserved areas who

Connect to other related funding opportunities happening in the region-- e.g. there is 250 M coming out in same timeline for K-16 partnerships-- workforce development projects that get funded by that should ideally be coordinated with these efforts.

more funding for community based organizations and grassroots organizations so they can engage in govt processes

Fund to pay residents to be at the table

Are there any other high priority issues that you would like to see CERF support?

Reduce time to train for clean economy infrastructure jobs. 4-8 year training program is not viable for our underserved communities to participate in without being paid.

increased support for community ownership type business and other models like community land trusts

If we provide wrap-around services, they need to be done differently than we have deployed them in the past. And done more efficiently and effectively.

Arts organizations who create our culture

ID the communities who have traditionally been left out of New technology jobs. And then do things differently- we can't continue to do things the way we always have.

prioritize workforce development and job opportunities for formerly incarcerated and others living in BIPOC neighborhoods

Capacity building and administrative funds for local orgs involved in implementation

Resources for teams/orgs to engage in continuous planning and improvement to be responsive to ongoing regional growth & change (and not just what is initially proposed-- what is our sustainability plan)
